

2023 coding challenge submission guide

How to submit your entry challenge solution using Repl.it?

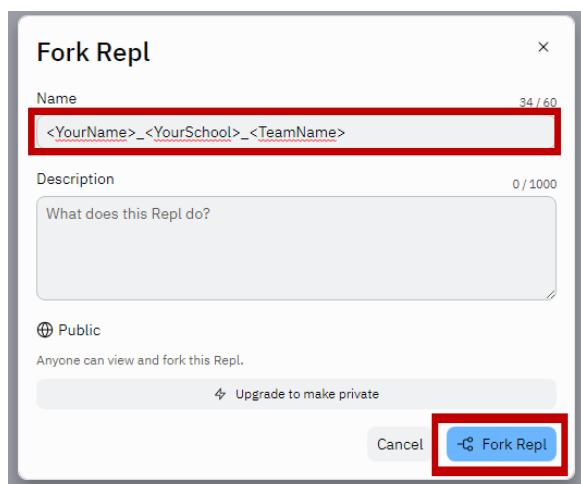

1. Sign up for an account on Repl.it: <https://replit.com/>
2. Fork from one of the following templates to implement your submission.
 - **Python:** <https://replit.com/@astitemi/codeit-2023-entry-challenge-python>
 - **Java:** <https://replit.com/@astitemi/codeit-2023-entry-challenge-java>
 - **Javascript:** <https://replit.com/@astitemi/codeit-2023-entry-challenge-js>
3. How to fork – the same steps apply to all templates:

Step 1: Open any of the template links above, click on “Fork”

Step 2: Rename your repl.it

- In the pop-up window, update the repl name with the following naming conventions
 - If you're signing up as a team** : **YourName_YourSchool_TeamName**
 - If you're signing up as an individual: **YourName_YourSchool_Individual**
- ** all team members are required to submit an individual submission
- Once the name of the repl is updated, click “Fork Repl”

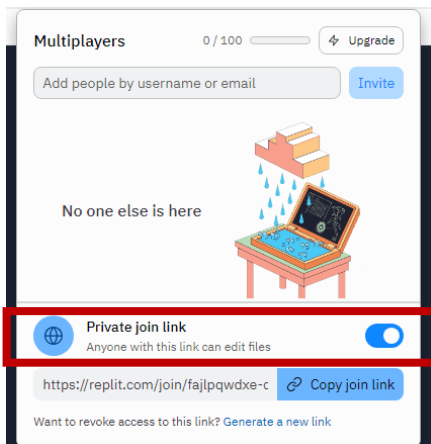

4. Generate link to the submission

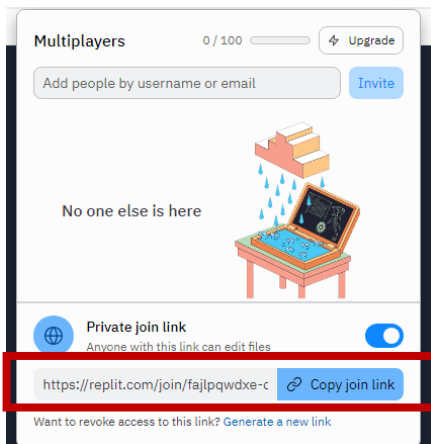

- Step 1: Click on "Invite" button at the top right-hand corner

- Step 2: Enable "Private join link" and click on "Copy join link"

- Step 3: The generated link is the link that you should submit as part of your application

5. The repl is automatically saved in "My repls", you can continue working on it (ie: there's no need to complete it at once)

6. To access your repl, navigate to "Profile" and click on the repl name.
