

# Bank Client Identifying Data

- Bank Client Identifying Data is information that identifies directly or indirectly an existing or future client of Credit Suisse. A Credit Suisse client can be identified by revealing its identity (e.g. first & last name, company name, signature, telephone number, physical address, e-mail address, social network IDs, etc.).
- Examples

Bank Client Identifying Data	No Bank Client Identifying Data
Recipients of shipments from Credit Suisse	Supplier name, address and other information on the invoice
Name and address of properties	Credit Suisse Contractor name on an invoice
Personal or company name and address in law firm cases	Credit Suisse office addresses

on the invoice and in any attachment to the invoice
