Preamble

Corporate governance

Together with the Articles of Association, the Code of Conduct, the BoD and Committee Charters, and the Compensation Policy, the OGR defines the corporate governance guidelines of the Group. These form the basis for effective and efficient corporate governance of the Group.

Group

The Group consists of CSG and all its direct and indirect subsidiaries, which together form one economic unit.

CSG

CSG is a holding company domiciled in Zurich, Switzerland. Its statutory purpose is to hold direct or indirect interest in all types of businesses in Switzerland and abroad, in particular in the areas of banking, finance, asset management and insurance. CSG sets standards for the Group to allow for an efficient and harmonized steering of the Group.

Governance principles

The governance of the Group is based on the principles of an integrated oversight and management structure with global scope. In particular, as an organization active in the financial services industry, Swiss regulatory principles of consolidated supervision apply to the Group governance and organization. Corporate bodies and officers are, subject to applicable local laws, regulations and best practice standards, bound to ensure transparency and collaboration throughout the Group, in particular through the appropriate flow of information and cooperation within and across all businesses and organizational structures. In addition, it is an important principle that conflicting interests shall, to the extent possible, be avoided, disclosed and aligned.

Business

The Group is engaged in the banking business, which is primarily performed through CS and its Major Subsidiaries. CS is domiciled in Zurich, Switzerland. The statutory purpose is the operation of a bank, and its scope of operations extends to all types of banking, financial, advisory, service, and trading activities in Switzerland and abroad. CS and its subsidiaries are provided with infrastructure and other services through the service company Credit Suisse Services AG, Switzerland.

Group structure

The Group is structured into four Divisions (Wealth Management; Investment Bank; Swiss Bank; and Asset Management) and four geographic Regions (Switzerland; EMEA; APAC; and Americas). The Regions reinforce the Group's integrated model of global businesses and support the Divisions and Corporate Functions across the various businesses, in particular in terms of market, client and talent development. In addition, the Regions oversee the legal entities, maintain the relationship with the regulators and ensure a robust risk-based control environment. The Corporate Functions provide products, infrastructure and services to the Divisions and Regions, as well as perform control activities independent from the Divisions and Regions. The Divisions and Regions coordinate their activities in collaboration with the Corporate Functions where appropriate.

Division Wealth Management

WM provides private banking and wealth management capabilities to clients globally (except United States of America).

Division Investment Bank

IB is responsible for (1) the fixed income and equities sales and trading business globally; (2) coverage of corporations, financial institutions, sovereigns and financial sponsors for M&A advice, debt and equity underwriting and related solutions globally; and (3) the provision of investment banking products and solutions for ultra high net worth clients in the United States.

Division Swiss Bank

SB provides domestic personal & business clients, private clients, corporate and institutional banking capabilities to clients in Switzerland.

Division Asset Management

AM provides investment solutions and services globally to a broad range of clients, including pension funds, governments, foundations and endowments, corporations and individuals.

I. Introduction

1. Scope and content

- 1.1 The OGR establishes the duties and responsibilities of the BoD and its committees, the Chairman, the CEO, the ExB, and the ExB committees, as well as certain executive functions of the Group. It further establishes the duties and responsibilities of the Corporate Functions, the Divisional CEOs, the Divisional MCs, the Divisional RMCs, the Regional CEOs, the Regional MCs, and Internal Audit.
- 1.2 The OGR shall be applicable to CSG and CS. As long as the BoDs and ExBs of CSG and CS are mainly composed of the same persons, the meetings of the BoDs respectively ExBs shall be held for both companies simultaneously and with the same agenda, and the minutes of these meetings shall reflect the decisions taken for both companies, except for specific items which are different for each company (e.g. statutory financial statements, preparation of shareholder meetings). The same principle applies to the activities and meetings of the BoD and ExB committees.
- 1.3 To the extent permitted by local law and regulatory guidelines, the organizational regulations of the other direct and indirect subsidiaries and other enterprises owned or controlled by CSG shall reflect the same principles and rules as stated in this OGR.
- 1.4 CSG controls directly or indirectly all of its subsidiaries and sets standards for the Group to allow for an efficient and harmonized steering of the Group. Notwithstanding this, the legal independence of all subsidiaries and the provisions of applicable local laws, rules and regulations relating to them must be observed to the extent legally required. Each subsidiary may establish additional separate regulations to regulate business specific to such entity.
- 1.5 Governance bodies and officers are, subject to applicable local laws, rules and regulations, bound to ensure transparency and collaboration within the Group. Governance bodies and officers may have multiple responsibilities and reporting lines within the Group.
- 1.6 The responsibilities and authorities set out in these regulations including the annexes may only be delegated if expressly permitted herein or with the explicit approval or ratification by the BoD for a specific transaction or activity.
- 1.7 Notwithstanding any delegation of authority or approval process provided for in these regulations, no person shall participate in the approval, execution or implementation of any transaction (including the opening, closing or managing of a client's account) or otherwise have any responsibility for or role in the execution or implementation of any such transaction, if such participation, responsibility or role would cause such person or any entity within the Group to violate any law or regulation to which such person or entity is subject.
- 1.8 CSG may allocate full management responsibility over its directly held subsidiaries to CS. The ExB shall decide to which extent they shall be integrated in CS's management processes.

2. Approval procedures for urgent business matters

- 2.1 Should immediate action be required to ensure the conclusion of an urgent business matter, which lies in the authority of the BoD, provided that the BoD is not in a position to act in time (e.g. lack of a quorum) and there is no clear indication that the BoD would not approve the respective proposal, the matter may as an exception be approved by the Chairman. To the extent possible, available BoD members shall be consulted.
- 2.2 Should immediate action be required to ensure the conclusion of an urgent business matter which lies in the authority of a particular body or executive function, provided that the authorized body or executive function is not in a position to act in time and there is no clear indication that the business matter contains excessive risks or the authorized body or executive function would not approve the respective business matter, and there are no other instructions from the CEO or the responsible ExB member, the respective business matter may as an exception be approved by the body or executive function one level below the authorized body or executive function. In any event, the CEO or the responsible ExB member, to the extent possible, must be consulted.
- 2.3 If the procedure outlined in section 2.1 and 2.2 is applied, the BoD or the authorized body or executive function (as applicable) must be advised of such transaction or business matter at the earliest opportunity.

II. Board of Directors

3. Organization

1. General provisions

- 1.1 The management of credit risk is a joint responsibility between the Divisions and CRM. The ultimate credit risk decision generally lies with the Division, with CRM intervention being necessary in cases of material impacts on global portfolio limits. After credit assessment and endorsement by the respective front management, all credit exposures require approval under the authorities designated by the CRO, the Chief Credit Officer and Divisional CROs (subject to the provisions set out below). CRM can delegate authorities for the approval of credit transactions with fully standardized approval procedures to defined individuals from the front organization.
- 1.2 The CRO establishes and approves the Global Credit Risk Policy. The Chief Credit Officer – in consultation with the CRO – details the Global Credit Policy further by establishing divisional sub-policies.
- 1.3 All loans and other credit limits must be approved and documented and periodically reviewed in an independent credit review process in accordance with the policies set forth by the Chief Credit Officer.
- 1.4 The total credit limit for a client, or in the case of client groups, the aggregate of all total credit limits or transactions is relevant for the determination of the approval authority. This does not apply to credit transactions for which the CRM sets up fully standardized procedures for approval by representatives of the relevant front organization.

2. Approval authorities

- 2.1 The Chief Credit Officer has approval authority up to USD 3bn. Credit limits and underwritings exceeding this threshold are to be approved by the CRO.
- 2.2 The Divisional CROs have approval authority up to USD 2bn for investment grade and USD 1.5bn for non-investment grade.
- 2.3 Upon consultation with the CRO, the Chief Credit Officer shall establish a policy outlining the approval limits to be delegated to credit specialists, special managing bodies within CRM or defined representatives of the front organization. The maximum limit to be delegated may not exceed USD 2bn in aggregate. The policy shall also regulate the approval authorities establishing provision on credit positions, other actions in connection with credit recovery situation, temporary limit excesses and account overdrafts.
- 2.4 Upon consultation with the Chief Credit Officer, the Divisional CROs shall establish a policy outlining the approval limits to be delegated to credit specialists in their respective Divisions.
- 2.5 Any transaction which results in a counterparty exposure exceeding 25% of the available CET1 capital is subject to review by the CFO.

The anticipated hold level for underwritings is generally to be achieved within 90 days but may vary depending on the nature of the transaction. During a prescribed period, underwriting positions may be exempt from certain limits if approved by the ExB RMC or its delegates.
