Introduction of the performance fee calculation formula

A Performance Fee is payable when the following conditions apply:

$$(\text{NAV per Share})_t - (\text{HR Index Value})_t > 0$$

If this condition is met, then the following applies:

$$0.15 [(\text{NAV}_t - (\text{HR Index Value})_t)] \times \text{number of Shares}_t$$

where:

NAV_t = current unswung Net Asset Value prior to provision for Performance Fee

HR = Hurdle Rate

t = current Calculation Date

HR Index Value = benchmark value

Amendment in the "Performance Fee" section

The accrued Performance Fee shall be payable annually in arrears within one month after the end of the respective Reference Period, and, if Shares are redeemed during the Reference Period, the amount of Performance Fee included in the Net Asset Value per Share will be due and owed (i.e. crystallize) for these redeemed Shares at the time of redemption, ~~if the percentage increase~~ **in the case where the performance of the unswung** net asset value per Share Class over the Reference Period exceeds the ~~percentage increase on~~ **performance of** the benchmark relevant to the Subfund / Share Class in question over the same Reference Period.

The above amendments are for clarification purposes only and do not impact the way the performance fee is calculated.
