

# All the right notes

Customize your structured products playlist  
anytime, anywhere.

# In tune with your investment outlook

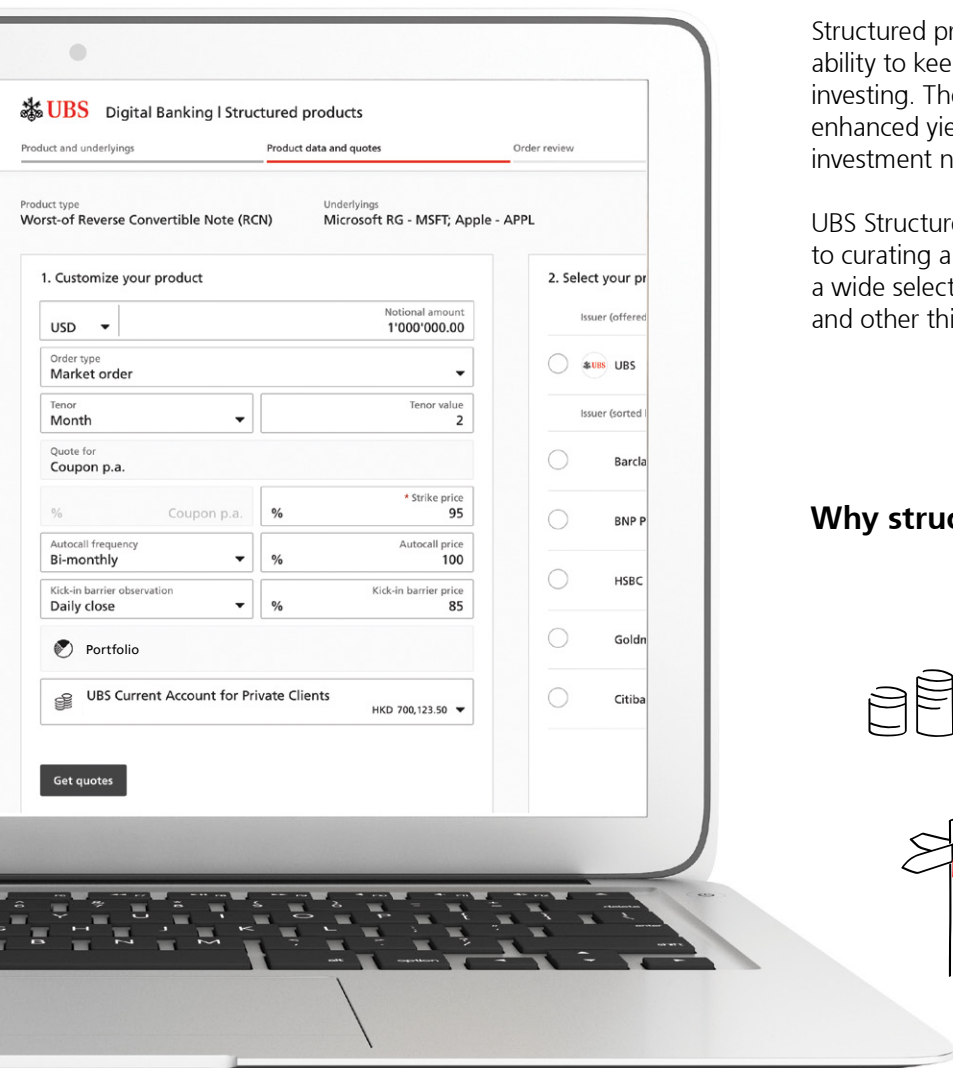

Just like how you create your favorite music playlist to suit the mood, you can personalize your investments to sync to any market rhythm with UBS Structured Products Digital.

Increased uncertainty and market volatility make it challenging for investors focused only on buying stocks. Now, you can compose your structured products and enhance your yield potential in every market mood. And even access a range of structured products from UBS and other providers on our open architecture platform.

In sync with the UBS ecosystem of digital banking capabilities, UBS Structured Products Digital helps you seamlessly stay in tune with your goals wherever you are.

# Structured products: Tap into a universe of options

Structured products have risen in popularity, given their ability to keep up with today's fast-paced world of investing. They offer you a unique blend of customization, enhanced yield, and diversification to suit your specific investment needs.

UBS Structured Products Digital offers a similar experience to curating a diverse music playlist by giving you access to a wide selection of structured products offered by UBS and other third-party providers.

## Why structured products?

### Enhanced yield

Tap on the potential to enhance your yield in any market condition, whether it is falling, rising, or moving sideways.

### Flexibility

Sync your needs and outlook. Structured products give you access to a wide range of opportunities within your time horizon.

1 Pick from equities across exchanges, geographies and sectors. You can even create a basket of equities with a global or sectoral theme.

2 Select from both UBS and/or other structured product providers.

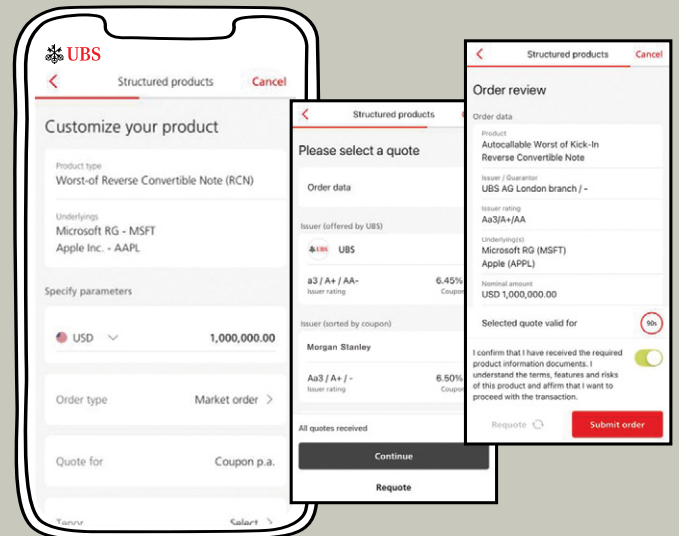

3 Set your pace with tenors from 2 months to 2 years.

# One platform, multiple playlists

With Equity-Linked Notes (ELNs) and Reverse Convertible Notes (RCNs) as a prelude, we will continue to expand the list of structured products to grow your investment options on UBS Structured Products Digital. Starting with equities, invest to your own beat based on your market outlook.

Pick your preferred structured product to express your view on its movement – does it move up, down, or range-bound? Customize your investments by choosing your countries, regions, sectors, and tenors with ease.

# Mix and match the way you like it

UBS Structured Products Digital allows you to access different exchanges across time zones and capture rapidly changing market opportunities. And instead of reaching out to your Client Advisor, you can customize your structured products and execute your trades from the comfort of your home, on the road, or anywhere you happen to be.

Whatever your preferred geography, sector, or time horizon, UBS Structured Products Digital has a playlist just for you.

John views an Asian basket will offer greater yield enhancement opportunities in the short term. He taps on UBS Structured Products Digital to conveniently capture the market opportunity. He picks a three-month tenor to match his outlook.

Amy, on the other hand, assesses that a European basket can improve her yield in the next year. She turns to UBS Structured Products Digital to customize a structured product with a one-year tenor to match her forecast.

# It's about making sound decisions

At UBS, we understand that each investor has unique goals, and we provide personalized solutions so you can achieve your objectives. UBS Structured Products Digital is part of our constantly expanding digital banking ecosystem, designed to help you make sound investment decisions anytime, anywhere.
