

The wins of change

APAC Sustainable
Finance Conference 2023

UBS

Sessions

Agenda subject to change

08:15 - 09:00 Registration & Light Breakfast

09:00 - 09:05 Welcome Address

09:05 - 09:30 Keynote Dialogue

09:30 - 10:00 Panel 1: Has sustainable investing created sufficient impact?

Over the past five years three letters - ESG, or environmental, social and governance - have taken the markets by storm. The number of sustainable investment products have more than doubled in the period, and according to the Global Sustainable Investment Alliance, sustainable investing assets now make up one in three invested dollars globally. But has this been contributive to the real world? In this session we invite investment experts across asset allocation, public and private markets to discuss how they implement sustainable investing concepts and what this means for our drive towards a more sustainable world.

TAN Min Lan

Head Chief Investment Office APAC, UBS Global Wealth Management

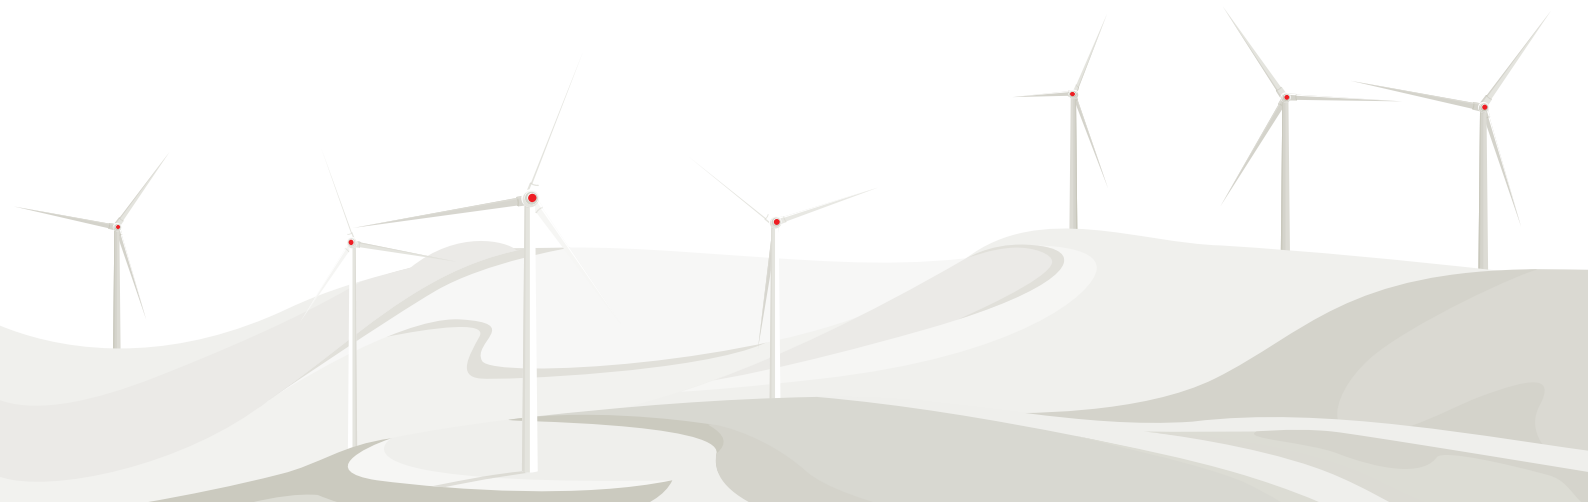

Mitch REZNICK

Head of Sustainable Fixed Income, Federated Hermes Limited

Moderated by:

Stephanie CHOI

Sustainable and Impact Investing Strategist, UBS Global Wealth Management

Sessions

10:00 - 10:30

Panel 2: Emerging Technologies for Sustainability

Have current technological developments enabled companies in Asia to decarbonise and grow at the same time? What are the success stories and where will we face new challenges? What separates the leaders from the rest in an industry transforming towards sustainability? Industry experts in this session will share their insights and thoughts through actual case studies and live experiences.

Melvyn YEO

Founder & Managing Partner, Trirec

Moderated by:

Nicolo MAGNI

Head of Global Banking, South East Asia & India, UBS Investment Bank

10:30 - 11:00

Coffee Break

11:00 - 11:30

Keynote #2: The world needs breakthroughs

According to the UBS Sustainability Report 2022, the shift towards a lower-carbon future is a priority for UBS and it is a key focus of our sustainability strategy. Every year, the world emits 51 billion tons of greenhouse gases into the atmosphere. To prevent a climate disaster, we need to lower that number to zero by 2050. That means we need unprecedented technological transformations in almost every sector of modern life. Find out how Breakthrough Energy Ventures are accelerating this transformation.

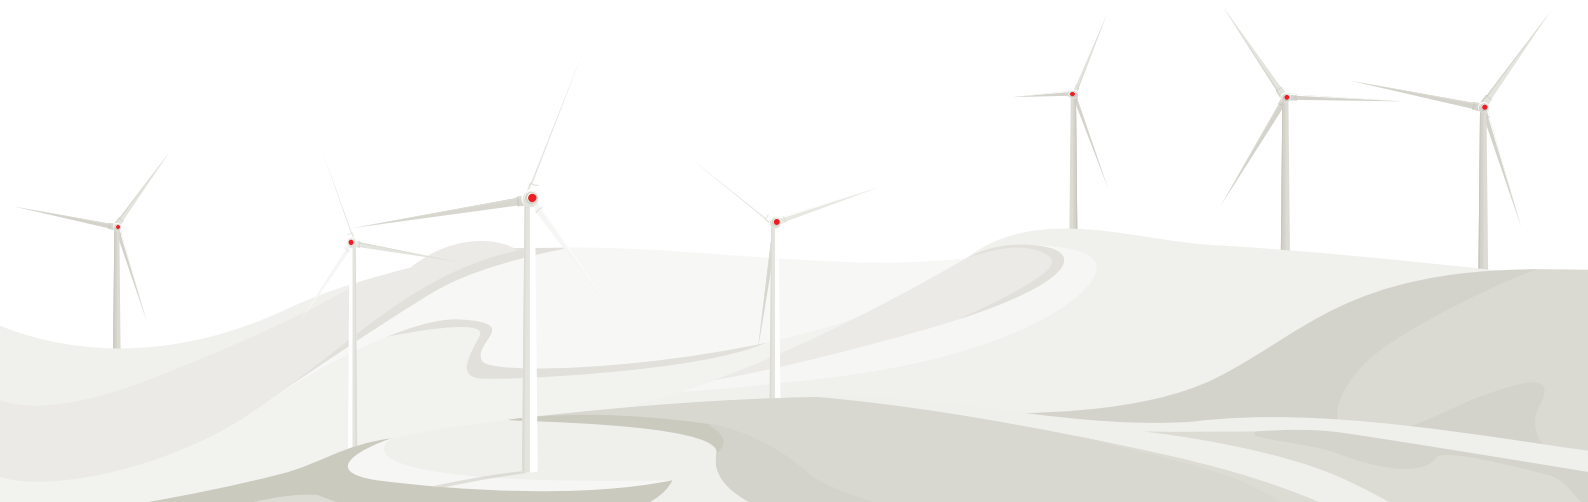

Cooper RINZLER

Partner, Breakthrough Energy Ventures

Moderated by:

Valerie LAU

Co-Head Sustainable finance APAC, APAC Sustainable Finance Office, UBS AG

Sessions
